A BEMORPORCE

BEMORPORCE

Fundada no ano de 1987, a Bemorporce é uma empresa transformadora especializada na produção de Artigos utilitários e decorativos em porcelana e grés fino.

Dada a sua flexibilidade produtiva aliada às mais recentes tecnologias de conformação e cozedura, permitem, através do know-how acumulado ao longo de décadas, garantir um portefólio de produtos diversificado. Assegurando a sua qualidade superior aos preços mais competitivos do mercado.

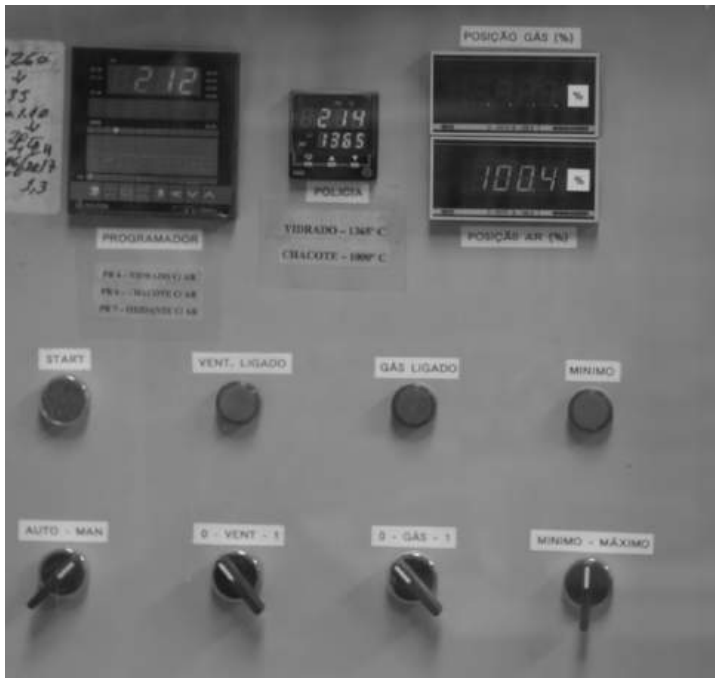

A empresa conta também com uma grande presença no mercado Internacional para o qual exporta mais de 70% do seu volume produtivo não só para a Europa mas também para o continente Americano.

Founded in 1987, Bemorporce is a manufacturing company specialized in the production of utility and decorative products in porcelain and fine stoneware.

Due to their productive flexibility combined with the latest technologies of conformation and cooking, they allow, through the know-how accumulated over decades, to guarantee a diversified range of products. Ensuring its superior quality at the most competitive prices in the market.

The company also has a large presence in the international market for which it exports more than 70% of its production volume not only to Europe but also to the American continent.

TERMOCONTACTO

THERMOCONTACT

O termocontacto é considerado o sistema ideal para manter os alimentos à temperatura correta durante um grande período sem deteriorar o seu aspeto bem como os seus valores nutricionais.

Todos os pratos, travessas, tabuleiros ou tigelas são caracterizados pelo seu fundo raso que permite um maior contacto com a fonte de aquecimento/ arrefecimento.

Dadas as propriedades térmicas da própria cerâmica, quando tapados, estes produtos permitem criar um microclima dentro do recipiente que evita a perda de água da comida, protegendo-a de ameaças vindas do exterior.

O termocontacto, é portanto uma forma simples e segura de conservar os alimentos elevando a sustentabilidade energética e ecológica.

The thermocontact is the ideal system to keep food at optimum temperature for a long period of time without losing its appearance as well as its nutritional values.

All dishes, platters, trays or bowls are characterized by their shallow bottom that allows greater contact with the heating / cooling surface.

Given the thermal properties of the ceramic itself, when capped, these products allow to create a microclimate inside the container that prevents the loss of water from the food, protecting it from threats from outside.

The thermocontact is therefore a simple and safe way to conserve food by raising energy and ecological sustainability.

SISTEMA MODULAR MODULAR SYSTEM

Personalizáveis. Existe um vasto leque de acabamentos coloridos.

A linha Gastronómica da Bemorporce caracteriza-se pela sua **permutabilidade modular**, encaixando na perfeição no sistema padrão de "Chefing Dish". Disponível em variados tamanhos, este produto permite uma maior flexibilidade organizacional na disposição e conservação dos alimentos.

A qualidade dos materiais aliados à tecnologia da Indução permite um controlo muito maior da temperatura dos alimentos. Preservando-os de uma forma muito mais **económica e sustentável**.

Customizable. There's a wide range of colored finishes.

*Bemorporce's Gastronomic line is characterized by its **muddy interchangeability**, fitting perfectly into the standard "Chefing Dish" system. Available in a variety of sizes, this product allows greater organizational flexibility in food disposal and preservation.*

*The quality of the materials combined with Induction technology allows to have a much higher temperature control of food. Preserving them in a much more **economical and sustainable** way.*

BASE DE INDUÇÃO INDUCTION BASE

Através do uso da base de indução, cozinhar ou aquecer os alimentos torna-se uma tarefa mais rápida, prática e limpa.

Ao adicionar uma base ferromagnética, é possível gerar calor a partir da base do recipiente quando colocado sobre uma placa vitrocerâmica. Esta tecnologia, para além da sua rapidez e sustentabilidade é também uma opção bastante saudável pois não liberta qualquer tipo de resíduos nos alimentos mantendo assim o seu sabor e qualidade.

Desta forma, apenas a base do recipiente aquece, deixando o vidro intacto, evitando assim o risco de danificar o produto. Para interromper a acumulação de calor basta retirar o recipiente da fonte de calor.

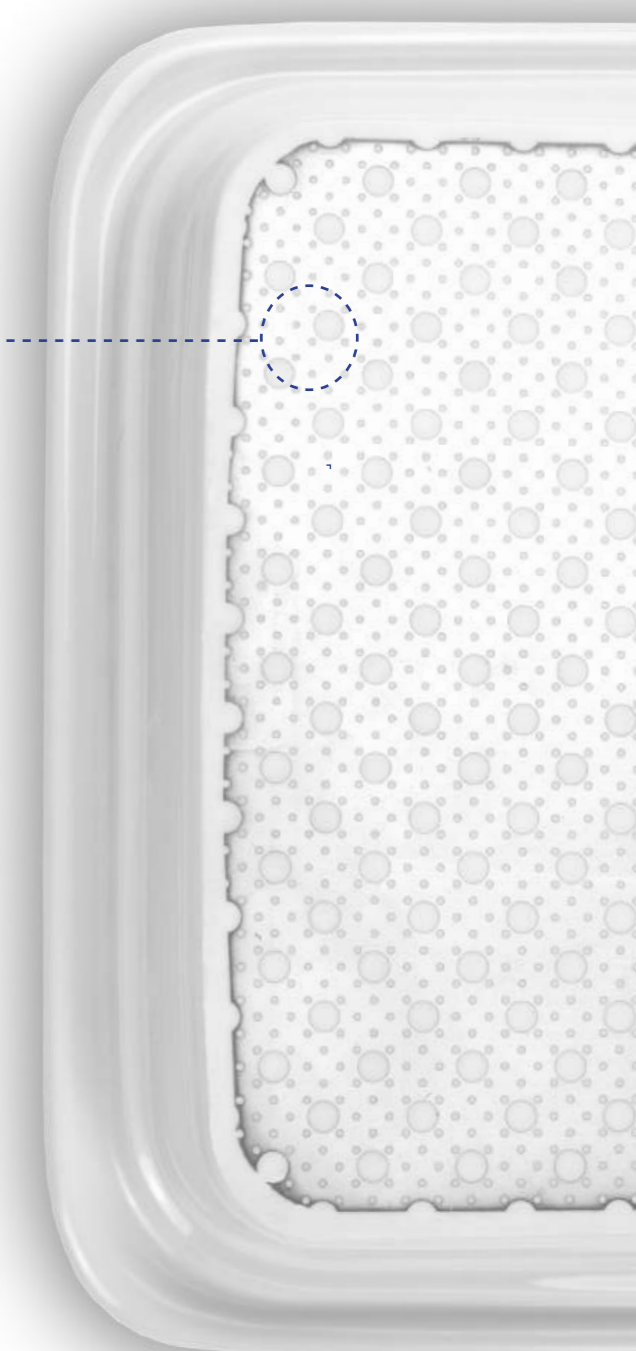

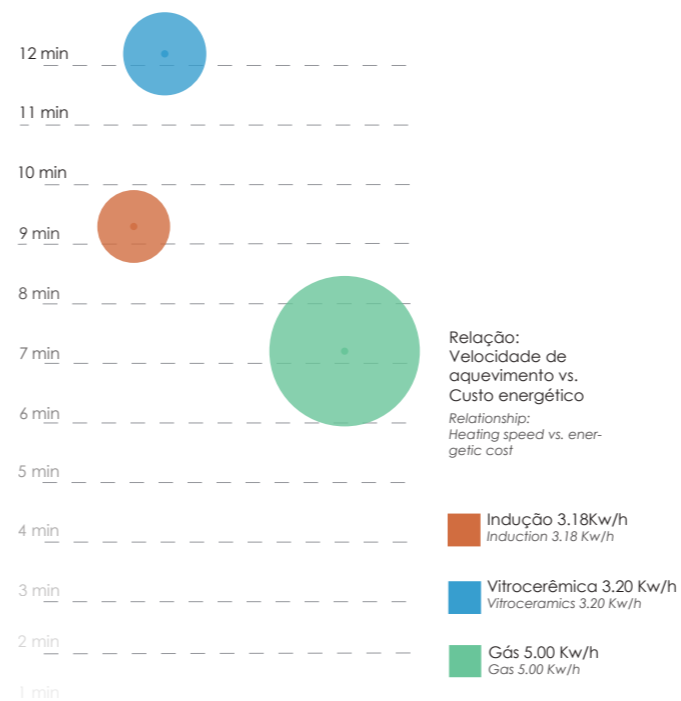

Para além de rápida e eficiente, esta é também uma forma limpa e prática de confeccionar os alimentos.

By using the induction base, cooking or heating food becomes a faster, more practical and cleaner task.

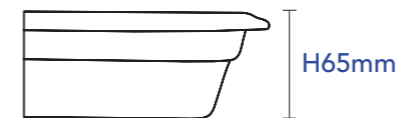

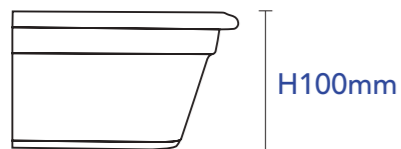

By adding a ferromagnetic base, it is possible to generate heat from the bottom of the vessel when placed on a glass-ceramic plate. This technology, besides its speed and sustainability is also a very healthy option because it does not release any type of residues in the food, thus maintaining its taste and quality.

In this way, only the base of the container heats up, leaving the glass intact, thus avoiding the risk of damaging the product. To stop heat accumulation, simply remove the container from the heat source.

In addition to being fast and efficient, this is also a clean and practical way of cooking food.
